DAILY PITTSBURGH GAZETTE.

MONDAY AFTERNOON, JANUARY 6, 1834.

THE CONNECTION WITH LAKE ERIE.—We have taken much satisfaction in urging this important work upon the attention of the public, and had fondly expected to have seen it speedily completed. The pecuniary embarrassment and difficulty bro't upon the country, by the madness and folly of the president, in removing the deposits, has thrown a damper upon our hopes, and we had concluded to say nothing more upon the subject until affairs assumed a more cheering aspect.—There is, however, in the last Erie Gazette, a long article which seems to demand a notice. From this article we make an extract; being that part which is more pointedly addressed to us.

"*The Lake Trade.*—The last Pittsburgh Gazette contains several articles on the magnitude and extent of the Lake trade, and the importance of securing it to Pennsylvania. The editor has informed himself well on the subject, and labors with zeal and ability; but strange to tell, he can see but *one* rout, by which the great end can be accomplished, and that is by the proposed cross cut from Newcastle to Akron. He seems entirely to have forgotten that there is a Pennsylvania rout—discovered years ago, and forming a part of the great original project of Pennsylvania improvements—or what is more likely, he studiously keeps it entirely out of view. *He never mentions it either in praise or dispraise*—never condescends to contrast it with his own favorite scheme. He *never has*, to our knowledge, *undertaken to show any reasons why this rout should be abandoned*, or why it would not command and control the Lake trade as originally designed by the fathers of the Pennsylvania system."

We are somewhat surprized at these remarks of the respectable editor of the Erie Gazette—we might expect to escape unnoticed, if we said nothing in *dispraise* of the route to Erie. That editor, however, is not satisfied with our silence—he wishes us to take sides for or against his rout, and this we are not willing to do. We will not say any thing in "*dispraise*" of it, because we are really friendly to it—because we hope to see it completed speedily.—We will not become the advocate, specially, *just now*, of that rout, because we do most sincerely believe that the connection with the Ohio Canal is the more important work of the two, and can sooner be completed.

The distance from Newcastle to Cleveland and to Erie is about the same; and of the former distance, a part, from Akron to Cleveland, is already in successful operation. An extension to Akron not only opens to Pennsylvania the trade of Lake Erie, but adds to her internal communications the entire length of the Ohio canal, exceeding three hundred miles. The editor of the Erie Gazette admits that an extension to Akron will secure to Pennsylvania the entire trade of the Ohio canal, but says that trade is a mere drop in the bucket when compared to the immense commerce which will soon be collected upon the bosom of Lake Erie.—In this we fully agree.—But still, a trade which, from 1825 to 1833, increased from $50,000, of *exports*, to $1,800,000, and which must continue to increase, is not to be neglected. The Mahoning rout will secure us this trade, and as much of the Lake trade as can be conveyed along it by the supply of water, which is very abundant. Eventually, however, the trade afloat on the Lake will exceed the capacity of *two canals* to convey it. Therefore do we say nothing in "*dispraise*" of the Canal to Erie—it will be necessary and *indispensable*, and, therefore, we are in favor of it.

NEW HOTEL.

Agreeably to notice, a meeting was held on Saturday evening, the 4th inst., at the house of Mr. George Beale, to take into consideration the propriety of erecting a spacious hotel, convenient to the Steam Boat landing, at this city. The meeting was organized by calling Mr. Thomas Bakewell to the chair, and appointing Mr. William Eichbaum Secretary. After the chairman had stated the object of the meeting, Mr. Abishai Way offered the following preamble and resolutions, which were unanimously adopted.

Whereas, it is deemed expedient, by this meeting, that a commodious Hotel should be erected for the better accommodation of travelers, strangers, and others, visiting this city, in some eligible situation, contiguous to the steam boat landings—and, it having been ascertained that the property at the corner of Water and Market streets can be obtained for that purpose—

Resolved, That a committee of nine citizens be appointed to obtain, in writing, from the owners of the property in question, their lowest prices and best terms of payment—and also to call upon the citizens generally, to receive from them subscriptions of stock to accomplish the above object.

Resolved, That inasmuch as it is the manifest interest of every citizen to promote an improvement calculated to invite the stranger and traveler to our city, and that all may have an opportunity of participating therein, the stock shall be divided into shares, of one hundred dollars each.

The meeting then proceeded to nominate the committee proposed in the foregoing resolution, and the following gentlemen were unanimously chosen, viz: Messrs. A. Way, John D. Davis, L. Hutchison, John Little, John Caldwell, William Holmes, Thomas Bakewell, M. Allen, and Benj. Darlington.

On motion of the Hon. Charles Shaler,

Resolved, That all the newspapers printed in this city be requested to publish these proceedings.

On motion, the meeting adjourned.

THOS. BAKEWELL, Chairman.

W. EICHBAUM, Secretary.

CONGRESS.

December 31.—In the Senate Mr. Ewing offered the following resolution, which, by unanimous consent, was considered and agreed to:

Resolved, That the Postmaster General lay before the Senate a statement of the amount of money, if any, which has been borrowed within the current year for the use of the Department, and that he designate the persons, or corporations to whom such loans (if any) may have been made and the date, amount and terms of each loan.

Mr. Ewing offered the following resolution, which lies one day on the table:

Resolved, That the Secretary of State lay before the Senate a copy of the commission under which William J. Duane lately acted as Secretary of the Treasury, and a copy of the commission under which Roger B. Taney now acts as Secretary.

Neither House of Congress sat yesterday. The day turned out to be a fine one, and a large proportion of the Members of Congress, the Foreign Ministers, and other public and private gentlemen, paid their respects to the Chief Magistrate, who, though apparently in feeble health, received them with his usual courtesy to visiters.—*National Intelligencer, Jan.* 2.

RICHMOND, Dec. 30, 1833.

The lead so gloriously made by the citizens of Richmond on Thursday night, headed by the eloquent and gifted Leigh, seems likely to be followed with almost equal unanimity by the General Assembly of this State. The Select Committee, to whom was referred the consideration of the arrangement made by the Secretary of the Treasury with the Bank of Virginia, this morning made their report, and, by a majority of *nine* to *two*, adopted resolutions condemning the arrangement in the most pointed and explicit terms, ordering its recision, censuring the Executive for his lawless act of usurpation, committed not less in defiance of the laws and Constitution of the country, than in violation of the plighted faith of the nation, and expressing the hope that Congress will take action upon the subject, in such manner as becomes the Representatives of a free and independent People.

Virginia has never been favorable to the Bank of the United States, although I am free to say, that the light, which recent discussion has thrown upon the affairs of that Institution, has gone very far to remove prejudice against it. But be that as it may, she regards the Bank question, in the language of Mr. Clay, "*as totally insignificant*" compared with the alarming stretch of power recently perpetrated by the Executive. Nor will she suffer her hostility to the Bank to blind her to the importance of vindicating the rights of even an unpopular institution, against usurpations of power, which are without precedent in the annals of this country. Despotism commences its approaches gradually. Its first victims are those who have the popular sympathies arrayed against them, of this Virginia is fully aware—and well she knows that the same lawless and insatiate appetite for plunder, which is seeking to crush the Bank of the United States, because it will not make itself subservient to the further extension of the encroachments upon the Constitution, would prostrate the Judiciary, or Congress, did they impede the onward march to unlimited and uncontrollable power.

We regard the issue now fairly made up between despotism, on the one hand, and the rights and liberties of the people, on the other. The Bank is the first victim—God only knows what will be the next. Virginia, since the organization of this Government, has been assigned the foremost rank in resisting all usurpation of power, Executive, Legislative, and Judicial—she will not now prove recreant to her high trust.—*Nat. Intelligencer, Jan.* 3.

January 1*st*, 1834.

A stated meeting of the Philadelphia Board of Trade, was held at the Merchant's Coffee House, Thos. P. Cope, Esq., President of the Board in the Chair, and a very large number of members present; the annual report of the Directors was read and accepted.

Henry Troth, Esq. offered the following preamble and resolution, which were adopted with two dissenting voices—

Whereas, the Board of Trade was instituted by the Merchants and Traders of the City of Philadelphia, as a special guardian to watch over and protect the various interests which support and sustain their prosperity; and, whilst it utterly disclaims any connection with the politics of the country, either local or general, or any wish to subserve party purposes, it would prove recreant to the principles upon which it was founded, were it to shrink from an open and fearless expression of its opinions upon any great question, which vitally affects the interests and prosperity of the trade and commerce of the country; and whereas this association has witnessed with deep concern the sudden change which has come over the community, and spread gloom and apprehension throughout the great interests which support its prosperity: and believing that this change cannot be ascribed to any other cause than the policy of the Government towards the Bank of the United States, by which the pecuniary concerns of the country have been deranged to an alarming degree; and believing also, that nothing will counteract those evils and restore the confidence of the people in their future prospects, but the restoration of the Bank of the United States to the station it has heretofore held as an agent of the government; therefore—

Resolved, That the board of directors be instructed to prepare and forward to Congress a memorial, embracing the principles set forth in the foregoing preamble, and such other matter as they may think appropriate for the occasion.

The following named gentlemen were elected officers and directors for the ensuing year.

President—Thomas P. Cope.

Vice Presidents—Matthew Newkirk, Richard Price.

Treasurer—Thomas C. Rockhill.

Secretary—George W. Toland.

Managers—Robert Toland, Caleb Cope, John Haseltine, John S. Riddle, Lewis Waln, William H. Hart, William R. Thompson, M. D. Lewis, Evan Rogers, W. W. M'Main, Thomas P. Hoopes, Hugh F. Hollingshead, John Grigg, Richard D. Wood, Alexander Read, Edward Roberts, Robert Patterson, J. G. Stacey, J. C. Oliver, Alex. Ferguson, Frederick Fraley.

The following letter from Washington, which we copy from the Baltimore Republican, contains intelligence of a highly important nature. The editor, who, we suppose, is acquainted with his correspondent, says that he cannot vouch for the authenticity of the information; but the complection of our relations with France at the time when Mr. Livingston left this country on his mission, renders it by no means improbable. We expressed our conviction, then—founded on, what we thought, conclusive evidence—that the delay in the execution of the treaty was to be attributed to an unfriendly disposition on the part of the French Ministry. It will be remembered that the President, in his last Annual Message, stated that certain documents, comprized in the stipulations of the Convention, had been withheld, and no satisfactory reasons assigned for the delay, though the interposition of the Chambers was not necessary for the delivery of the papers.—*Balt. Gaz.*

From the Balt. Republican—[a Jackson paper.]

IMPORTANT.—A correspondent, at Washington, gives us some information on the subject of our negotiations with France. It is of an interesting nature. We cannot vouch for its authenticity; but it will be seen that our friend declares it entitled to credence. We give it as we received it. If correct, we presume that a Message will be sent to Congress, in relation to it.

From our Correspondent.

WASHINGTON, 29th Dec. 1833.

To the editor of the Republican:

"I have heard, from a source which I consider as fully entitled to belief, that despatches have been recently received from our Minister in France, of a nature highly interesting to our Merchants. Mr. Livingston, with the promptitude and energy which have characterized all the negotiations commenced or continued since the succession of General Jackson to the Presidency, has, according to his instructions, urged the French Government to the completion of its engagements, under the convention concluded by our late Minister, Mr. Rives, for the indemnities for spoliations on American Commerce.

The French Ministers, it is stated, have thrown every impediment in the way of the final adjustment of this question, even so far as to refuse official copies of the condemnation of the vessels seized and sequestrated by the Court of Napoleon, contrary to the law Maritime, and the law of nations. This is done under the plea that the Chambers have made no appropriation for the payment of the sum agreed upon as the indemnity; but certainly such a pretext ought not to be advanced as a reason against granting copies of the official documents. Thanks to the energy of the President, however, the French Government will soon understand the nature of our diplomatic relations with them.

In this matter General Jackson expressly avowed yesterday his determination that the United States shall not submit to that which is wrong.—It will be sustained by the *Nation*, which desires nothing that is not right."

From Richmond we learn that the Committee of the House of Delegates of Virginia, on the subject of the relations of the State Banks to the Treasury of the United States, have agreed, by a vote of 11 to 2, to a report disapproving of the removal of the money of the General Government from deposit in the Bank of the United States, and recommending that it be restored to that depository. The sentiment of the Legislature is supposed also to tend that way; of which, however, we shall know more, certainly, when the report of this Committee comes to be acted upon.—*Nat. Intel.*

The legislature of South Carolina has adjourned, after passing the Militia Bill, and the Test Oath Act. The Senate receded from their objection to the oath. Under the Militia Act, Messrs. McDuffie, Hayne, and Hamilton, were elected Major Generals.

The legislature of Georgia has just adjourned.

The legislature of Tennessee has just adjourned.

The legislature of Maine met at Augusta yesterday, the first Wednesday in January.

The legislature of Massachusetts has a session in January.

The legislature of R. Island meets, for an adjourned session, in January.

The legislature of New York, will meet at Albany, on the 6th instant, the first Monday in January.

The legislature of Delaware met at Dover on Tuesday.

The legislatures of Pennsylvania, Maryland, Virginia, North Carolina, Alabama, Mississippi, Louisiana, Ohio, and Indiana, are in session.

In Missouri, and Illinois, the legislatures meet only once in two years. They do not meet till next winter.

The legislatures of the other States, meet at a different season of the year.—*Balt. Amer. Jan.* 2.

From the National Gazette, Dec. 31.

Mr. James Gordon Bennett has at length reappeared—in the Pa. Inquirer, of this morning.—It was thought that he resembled one of those spirits of the vasty deep that would not come when they were called; but *ecce* in a Preliminary address to the People, with a promise to produce the *letters* in his *next* number. In introducing the address, the editor of the Pennsylvania Inquirer says—

"We ask the attention of our readers to the following. It is the first of a series of letters which Mr. Bennett intends to address to the public, in relation to the baseness and intrigues of the Kitchen Cabinet, at Washington. The series will embrace several numbers, the second of which will contain the commencement of Kendall and Whitney's correspondence with Mr. Bennett. We have seen these letters, and, in our opinion, they confirm fully all the charges which Mr. B. preferred against those individuals, in his letter to Gen. Jackson some time since published. They also show, in a light too clear to be misunderstood, that the Kitchen Cabinet, Kendall & Co., are really the masters and controllers of the government, in the important measures of which the cabinet proper have, in fact, no voice."

Mr. Bennett's language is—

"I speak from personal observation of the men and the facts, and in a temper as cool and clear as the icicle on Dian's temple. By their own written correspondence, extending over a space of 12 months, and nearly a *dozen* letters, I shall convince the people that one of the most atrocious conspiracies that ever was engendered to degrade a nation and corrupt a people, is, at this moment, on the verge of complete triumph, and 'in the full tide of successful experiment.' Having been the editor of administration journals for several years—possessing unbounded confidence in the patriotism and purity of Andrew Jackson, I was on the footing of intimate intercourse with these men, and always believed them honest and patriotic, until their own acts proved the sad reverse. * *

"I gave General Jackson an account of their conduct, but that patriot is so busy in breaking up the United States Bank, and deranging the currency, that hitherto he has not had a moment's time to spare in examining the conduct of the cabal around him, and thus prepare to wind up their yet unsettled concerns." * * *

"One of the principal elements of the conspiracy is the organization of the Government officers and newspaper press throughout the country, in the shape of a permanent body of police, empowered to circulate the decrees of the central conspirators, denounce the refractory, destroy the character of the independent, and elevate the power and prerogatives of the Executive, without the slightest regard to the Constitution or laws of the country."

The Washington Globe, of Dec. 31, asks—

"Who does not know that Gen. Jackson first broke the charm of Mr. Clay's 'American System,' and by the influence of his known patriotism and inflexible integrity, paved the way for its destruction?"

The great portion of American citizens, in the Northern, Middle, and Eastern states, who cherished the American System, should learn who is thus proclaimed as its destroyer.—*Nat. Gaz., Jan.* 1.

The American Turf Register, for the present month, which made its appearance regularly, on the first, contains a letter, addressed by the editor, J. S. Skinner, Esq., to Gen. Gratiot, of the United States Army, on the importance of procuring the best wild horses of the prairies southwest of Cantonment Gibson. The horses that are found running wild in herds over that vast country extending westward to the foot of the Rocky Mountains, or in the possession of the Osage Chiefs, are represented by all accounts to be of the most powerful kind, superior to the very best horses among us, for speed and endurance. The celebrated naturalist, Mr. Audubon, rode one of them *three thousand miles*, continuously, without his losing a meal, or complaining a day; and an intelligent officer writes to Mr. Skinner that "no one has observed the Osages galloping over their boundless prairies, under the fervid sun, and maintaining this gait for hours, viewed their muscular and handsome steeds, and compared his own jaded nag with the bounding and restless animals around him, but has confessed the superiority of their horses." The race is supposed to be descended from the Arabian stock, through the celebrated Andalusian horses, of Spain, brought there by the Moors, and thence exported to the Spanish American provinces.

Arrangements have been made through the agency of several officers of the Army, to have some of the best of the kind selected and imported into this region, for the purpose of improving the stock.—*Balt. Amer.*

STATEMENT

Of the quantity of Rain which has fallen in each year, from 1810 to 1833, inclusive—the first fourteen years by the guage by P. Legoux, at Spring Mill, and the following ten years by that kept at the Pennsylvania Hospital:—

	Inches.		*Inches.*
1810,	32,656	1822,	29,864
1811,	34,968	1823,	41,815

1820,	39,609	1832,	39,870
1821,	32,182	1833,	48,550

Thus the whole quantity which fell in the above 24 years, was 880,503 inches.

The average of the 23 years, ending with 1832, was 36,172 inches. The depth of the rain which fell in 1833, was therefore above 12 inches greater than the *average* of the 23 preceding years.

The rain in each month of the year 1833, was as follows:—

Extract of a letter from a gentleman attached to the U. States' frigate Potomac, received via Panama, dated

"LIMA, 26th September, 1833.

"By the English brig Arab, from Arica, we are informed of the desolation of that place and Facna, by a dreadful earthquake, which was experienced there on the 18th inst. That but 13 or 14 houses are left in Arica, appears certain, and the number of lives lost is estimated at from 6 to 700. Facna is said to be totally destroyed. The beautiful valley of Zapa is laid waste. The famous White Bluff (about 200 feet in height) on the right hand as you enter the harbor of Arica is now nearly on a level with the ocean; and two small islands on the same side are sunk so that a frigate can sail over them. The first shock was felt about half past 10 o'clock, P. M., and was succeeded by three others, at intervals of two, three, and five minutes, the last of which was most severe. The sea rose about thirty feet higher than usual."

A wiseacre asks, in one of the Northern papers, whether an institution having the power to do so much mischief as the Bank of the United States, should be suffered to exist in this country? As a general consideration, the same argument would be good against all government, the elements of fire and water, steam, horses, cattle. The most beneficent and useful man may have the power to do much mischief; but he is not therefore to be brained. In the case of the Bank, what is called the power of mischief, is nothing more than the operation of measures rendered inevitable by the wanton and deadly hostilities which have been waged against it. Until the Kitchen Cabinet pronounced its doom, the only power which it exerted was that of invaluable service to the country. If President Jackson should please to apply a torch to his mansion, so that it should be soon wrapped in flames, it would be quite as reasonable to cry out that an element with so much power as fire, should not be suffered to exist in the country.—*National Gazette.*

Bone dust for Cultivation of Grain.—The exportation of bones, from Germany to England, constitutes a singular epoch in the annals of commerce. Myriads of tons have been already exported without glutting the market, or causing a cessation of the demand. In the vicinity of the North Sea, mills have been erected to pulverize them.—This bone powder, or bone dust, was long ago exclusively applied to the purposes of hot houses by German horticulturists; but the English, emboldened by their riches, have extended its use to general objects of agriculture, and fertilize, by these expensive means, their cold, humid, and poorest land; and have thus brought the uplands of Nottinghamshire, the western parts of Holderness, &c., into the highest state of cultivation, both in point of extent and intenseness of fertility. There is, consequently, a proverb, "that one ton of German bone dust saves the importation of German corn." As Malta formerly covered her naked rocks with foreign soil, so does England now fertilize her clay and sandy heaths with German bones. Near the sea coast even the church yards are robbed of their venerable relics, which is ironically excused by rendering the German bone trade popular. An agriculturist being rendered attentive by this vast exportation, instituted privately some comparative experiments, the results of which prove bone dust acts in the cultivation of grain, as compared to the best stable manure,—1. In respect to the quality of corn as 4 to 5;—2. In respect to quantity as 5 to 4;—3. In respect to durability of the energy of soils as 3 to 2. It produces several collateral advantages. 1. It destroys the weeds;—2. It diminishes the necessity of suffering the land to lie fallow;—3. This concentrated manure, or substitute for manure, is more easy of conveyance, less laborious to spread, and can, with facility, be applied to the steepest vineyards, or other inaccessible lands, either in mountainous countries, or in wet meadow lands;—4. It renders agriculture practicable, without cattle breeding, grazing, &c.

The catalogues of books of the Michælmas fair, at Leipsic, contain 2,372 new works, now, or about to be published, by 243 booksellers.

Shishak's Victory over Rehoboam.—The truth of this part of Sacred History has lately received a most remarkable confirmation. One of the great palaces of the Egyptian Kings, at Karnac, was partly built by Shishak, or, as the Egyptians called him, Sheshonk; and, on one of the walls, which is still standing, Champollion, in his visit to Thebes, in 1828, discovered a piece of sculpture representing the victories of this Pharaoh, who is dragging the Chiefs of thirty conquered nations to the idols worshipped in Thebes. Among the captives is one, the hieroglyphics upon whose shield contain the words "Ioudaba Malek," which means King of Judah. The figure, therefore, represents Rehoboam, the only Jewish King vanquished by Shishak; and thus, after the lapse of two thousand eight hundred years, we have the unexceptionable testimony of an enemy, to the faithfulness of Scripture History.—*Outlines of Sacred History.*

The deposits will be restored—there is no doubt of it. But the Regency and K. C. are determined that the *President*, and not *Congress*, shall take measures on the subject. Mr. Van Buren has had some alarming intimation respecting the safety fund banks, and is pressing hard upon the subject. If one country bank cannot meet its notes, the whole bubble bursts, and he bursts with it.—*Evening Star.*

It is stated in the National Intelligencer, that the Post Office Department has paid to the Globe the good round sum of $12,000 for advertising, in one year. No wonder the Globe is so earnest in the support of an administration that so liberally supports it.

Gen. Lafayette has sold to three gentlemen of Florida, the township of land granted to him by Congress. The price is not mentioned, but the land is described by the Floridian as the very best in the territory, and the sale and settlement of the tract, it is believed, will add very much to the prosperity of Tallahasse, in the immediate neighborhood of which it lies.

It is now confidently stated, that the Rail Road between Lancaster and Columbia, will be ready for use in about one week.

CARLISLE IRON WORKS
FOR SALE.

THIS valuable property, late the estate of Michael Ege, deceased, consists of about 8,000 acres of land, including three Farms, on which are a furnace, forge, grist mill, saw mill, and rolling and slitting mill; with all necessary barns, stables, coal houses, out houses, and dwellings for families of the workmen, in the most complete and permanent state. The water power being derived, principally, from a large limestone spring, to which the stream of the Yellow Breeches has been added, is more than adequte to the purposes of the works; and has besides the uncommon advantage of being unaffected by ice or back water. An inexhaustible bank of mountain ore of the best quality for bar iron, is found on the estate, two miles from the furnace, and limestone ore may be had in a situation equally convenient. The wood land and meadow are amply sufficient for the supply of the works, which are advantageously situate as respects a market, being but seventy miles from Baltimore, five from Carlisle, and sixteen from the Susquehanna. This desirable property will remain for private sale till the first of April next, when it will be offered at vendue, if not sooner disposed of. For terms, apply to the subscribers, either at Carlisle or Philadelphia.

J. APPLETON'S LATE IMPROVED
WASHING MACHINE.

THIS valuable improvement has been preferred by all who have used it to any other machine of the kind yet offered to the public.—It is expeditious, without injuring the clothes washed, as will be seen in the certificates below. All those who wish to save labor in washing, will please to call and see the operation, at the Masinon House, corner of Wood and Fifth streets. Machines, and the right of counties for sale—Machines 12 dollars—and at any persons service for trial. Dec. 31, 1833.

We have had in use Appleton's Patent Washing Machine, and do not hesitate to say that it is preferable to any that we have seen or used. A woman can wash as much in one day, with the machine, as she could in three by the hand, and only half the soap is necessary. We think it clears the clothes better than hand washing, without injury to them. We have also used Barnes' Patent Steam Washing Machine, called Peg Machine, but give Appleton's the preference. It washes cleaner and faster; therefore we recommend Appleton's Machine to the public in general.

Lucy Higginbotham, | Elizabeth McKim.
Robert Poore,

We have in use Appleton's Patent Washing Machine. It is so simple in its construction that it may be used by any unskilful hand, and we do recommend it as a great saving of time and labor.

Hamilton County Agricultural Society.

It is hereby certified, that the Judges, appointed by the Hamilton County Agricultural Society, for the exhibition, held at Mill Creek, on the second of October, 1833, having awarded that Appleton's Washing Machine, submitted to the Society, on trial, appeared to their satisfaction to be of utility as a labor saving machine in domestic economy—they unhesitatingly recommend it to their fellow citizens—in testimony whereof, this Certificate is given. FAIRBANK'S PLATFORM SCALES.

THESE scales are constructed upon an improved principle; are fitted up with great care by the manufacturers, and warranted to weigh with accuracy from half a pound to 12,000. Being placed in, and forming part of, the floor, the process of weighing is performed with ease and facility, while the space they occupy may be improved as a passage way or for other purposes.

The construction of these scales is such that they are little liable to derangement of wear, and their perfect operation will be guaranteed for any reasonable length of time.

The usual objection, that a new method of weighing cannot be safely entrusted to unskilful hands, is obviated by the use of the improved BALANCE, concerning which are the following remarks in the Journal of the Franklin Institute, of the state of Pennsylvania, for the promotion of the Mechanic Arts, for June, 1833. (Edited by Thos. P. Jones, M. D., late Superintendent of the Patent Office, at Washington, Professor of Mechanics in the Franklin Institute, &c.

"The Messrs. Fairbanks, some time since, obtained a patent for a Platform Weighing Machine, and this mode of adjuating and graduating the Beam of the Balance, and the weights, was devised by them with a view to its employment with the before mentioned machine. We have had an opportunity of examining one of their balances, and have been much pleased with it: this examination, however, was not necessary to the conviction that it possesses a just claim to the character of a real improvement, the whole arrangement being so simple as to enable any person to perceive that it is well adapted to the purpose contemplated, that of facilitating the business of weighing, and more especially of heavy articles."

The subscriber, as Agent, will receive orders for the above Scales, which will be made in this city to order. They can be seen at his Warehouse, No. 84, Front street.

Nov. 8, 1833. MOSES ATWOOD.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40
other lots, containing about			6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county—and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others—a soil rich and productive—the neighborhood abounding in coal—well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

DOCTOR ROBERT'S
☞*WELCH MEDICAMENTUM.*☜

FOR the cure of Dyspepsia, Liver Complaints, Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

UTICA, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer is vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

GEO. W. CARPENTER'S
COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradually increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.

TRAVELLERS.

THE LINE OF STAGES between Chambersburgh and Baltimore, on the Somerset and Mountpleasant route, has been doubled, and now runs DAILY, (Mondays excepted,) leaving Chambersburgh *at day-light* in the morning, and arriving in Baltimore, early the same evening.

Passengers reach Philadelphia, in this way, the second afternoon, from Chambersburgh, without the loss of any rest; taking the splendid STEAM BOAT LINES, which set out at 6 o'clock in the morning, [via CHESAPEAKE AND DELAWARE CANAL, a work well worth the trip to see.]

REESIDE, Owner.

In all cases where the passengers desire to reach Baltimore in time for the 5 o'clock steam-boat to Philadelphia, they can do so by leaving Chambersburgh at one o'clock in the morning, or immediately after the arrival of the Western Mail Stage. In this way, they arrive in Philadelphia, by eight o'clock the *second morning*, from Chambersburgh.

☞When a load offers, the stage will run on Mondays. April 23, 1830.—tf.
